Revenue by Order Value Band

Total Revenue, Total Orders & Revenue per Unit

Total Revenue

₹1.78M

Total Orders

500

Revenue per Unit

₹1.87k

INSIGHT

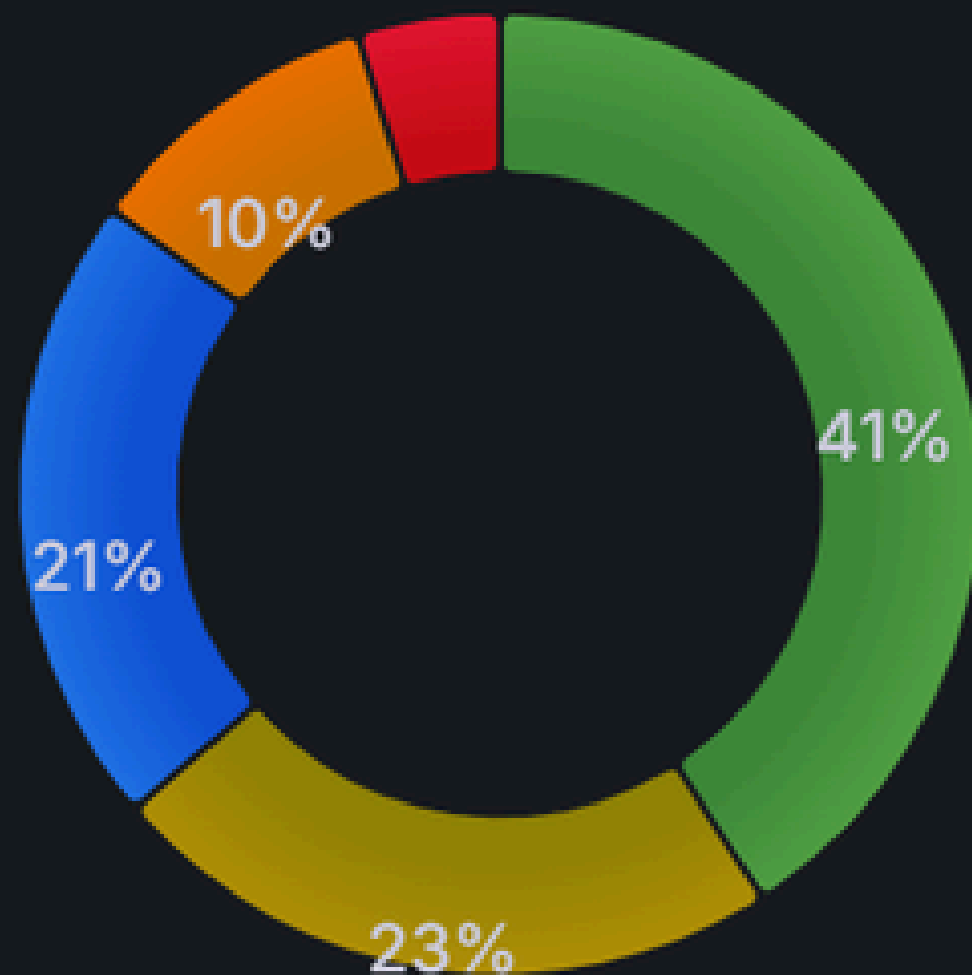

- Generated ₹1.78M revenue from 500 orders.
- Revenue per unit stands at ₹1.87K.
- Indicates strong overall sales activity and measurable revenue efficiency.

BUSINESS VALUE

- Provides a quick view of overall sales performance.
- Helps balance order growth with revenue efficiency.

Revenue Contribution By Category

Revenue Contribution by Category

Home	41%
Electronics	23%
Fashion	21%
Beauty	10%
Grocery	5%

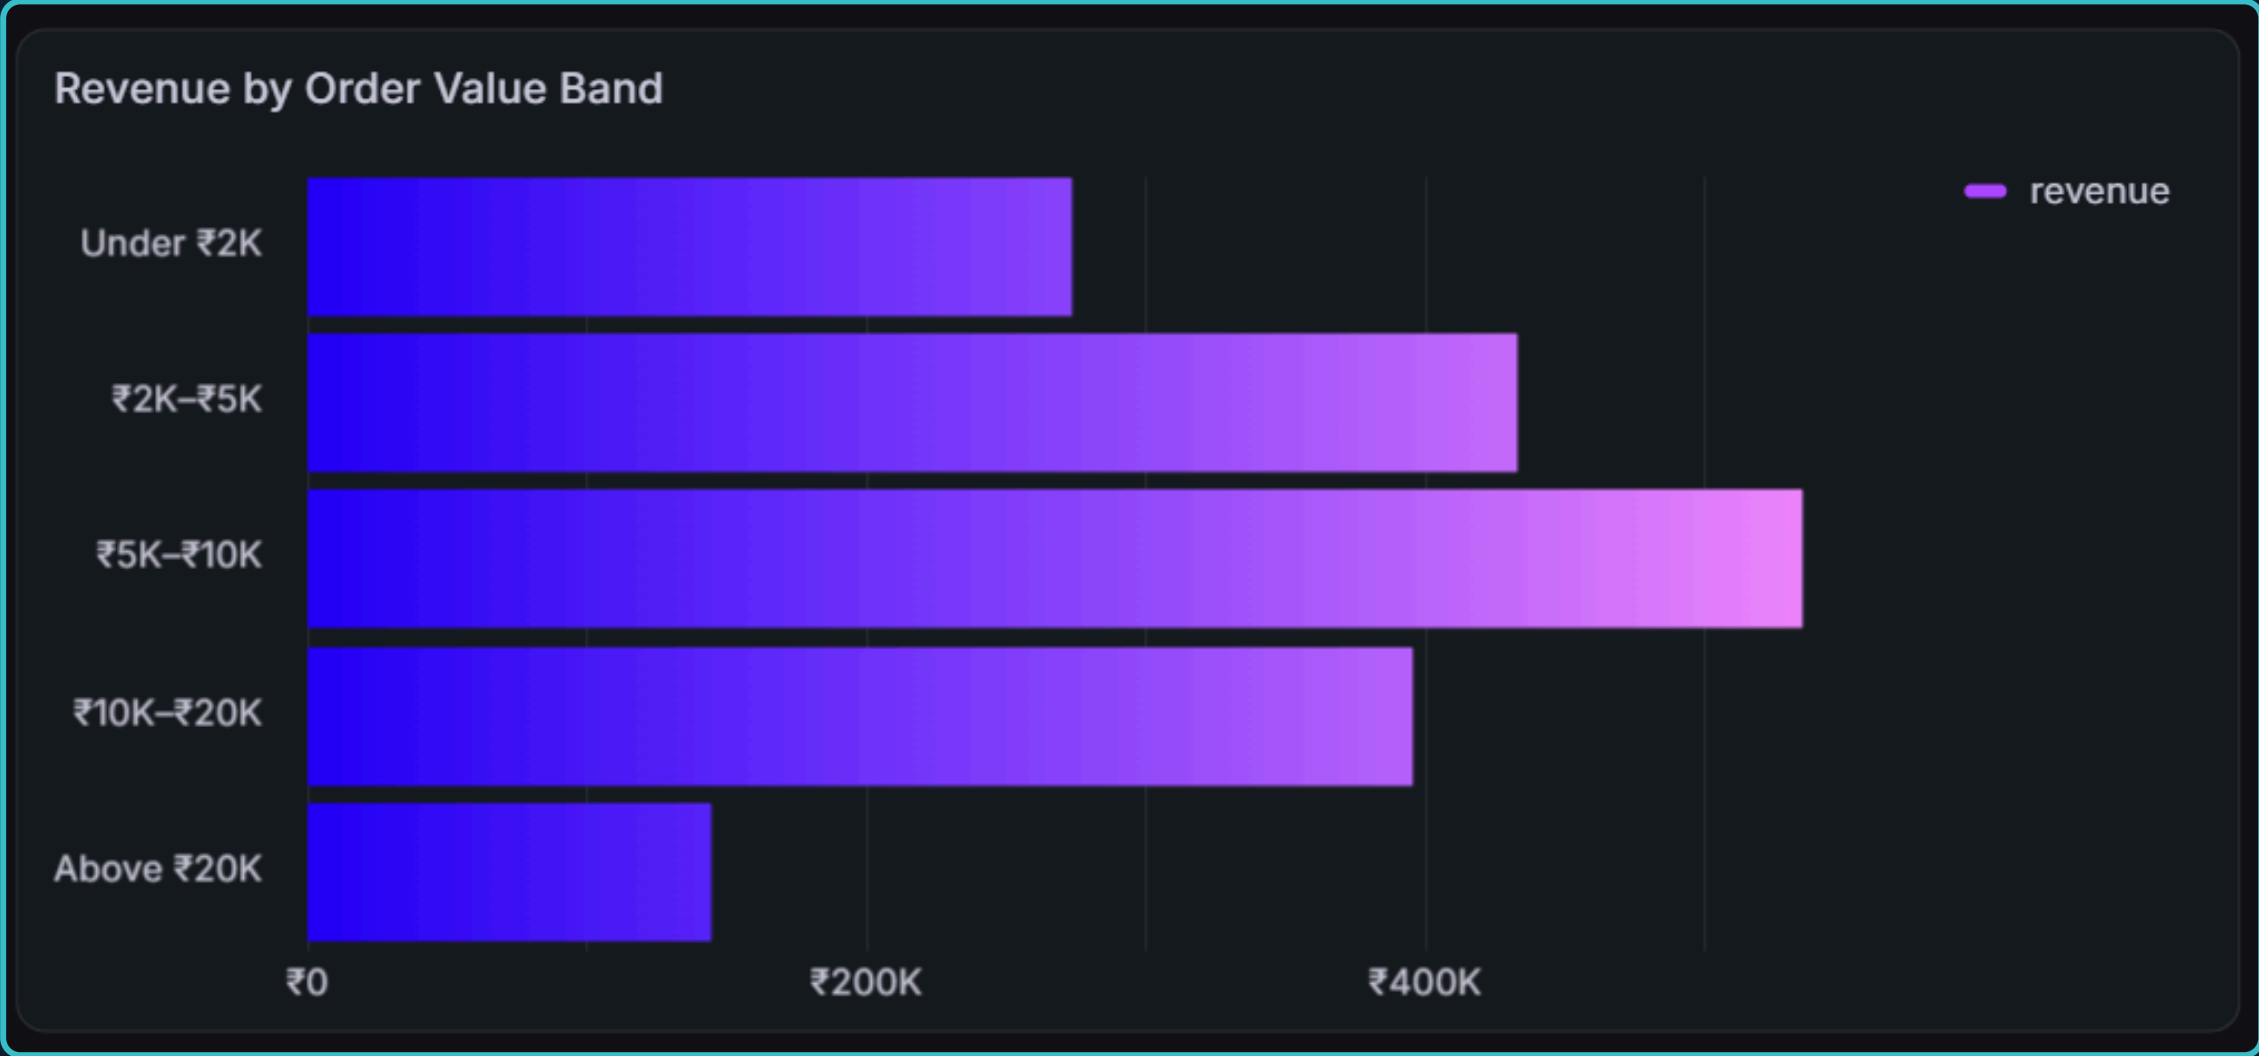

INSIGHT

- Home leads revenue contribution at 41%.
- Electronics and Fashion contribute 23% and 21% respectively.
- The top three categories generate 85% of total revenue.

BUSINESS VALUE

- Helps prioritize high-contributing categories.
- Highlights opportunities to manage category concentration and diversification.

Revenue By Order Value Band

INSIGHT

- ₹5K-₹10K orders generate the highest revenue.
- Mid-value order bands contribute most to overall revenue.
- Orders above ₹20K contribute a smaller share of revenue.

BUSINESS VALUE

- Identifies high-value order ranges driving revenue.
- Supports strategies to increase customer basket value.

Average Order Value

AOV

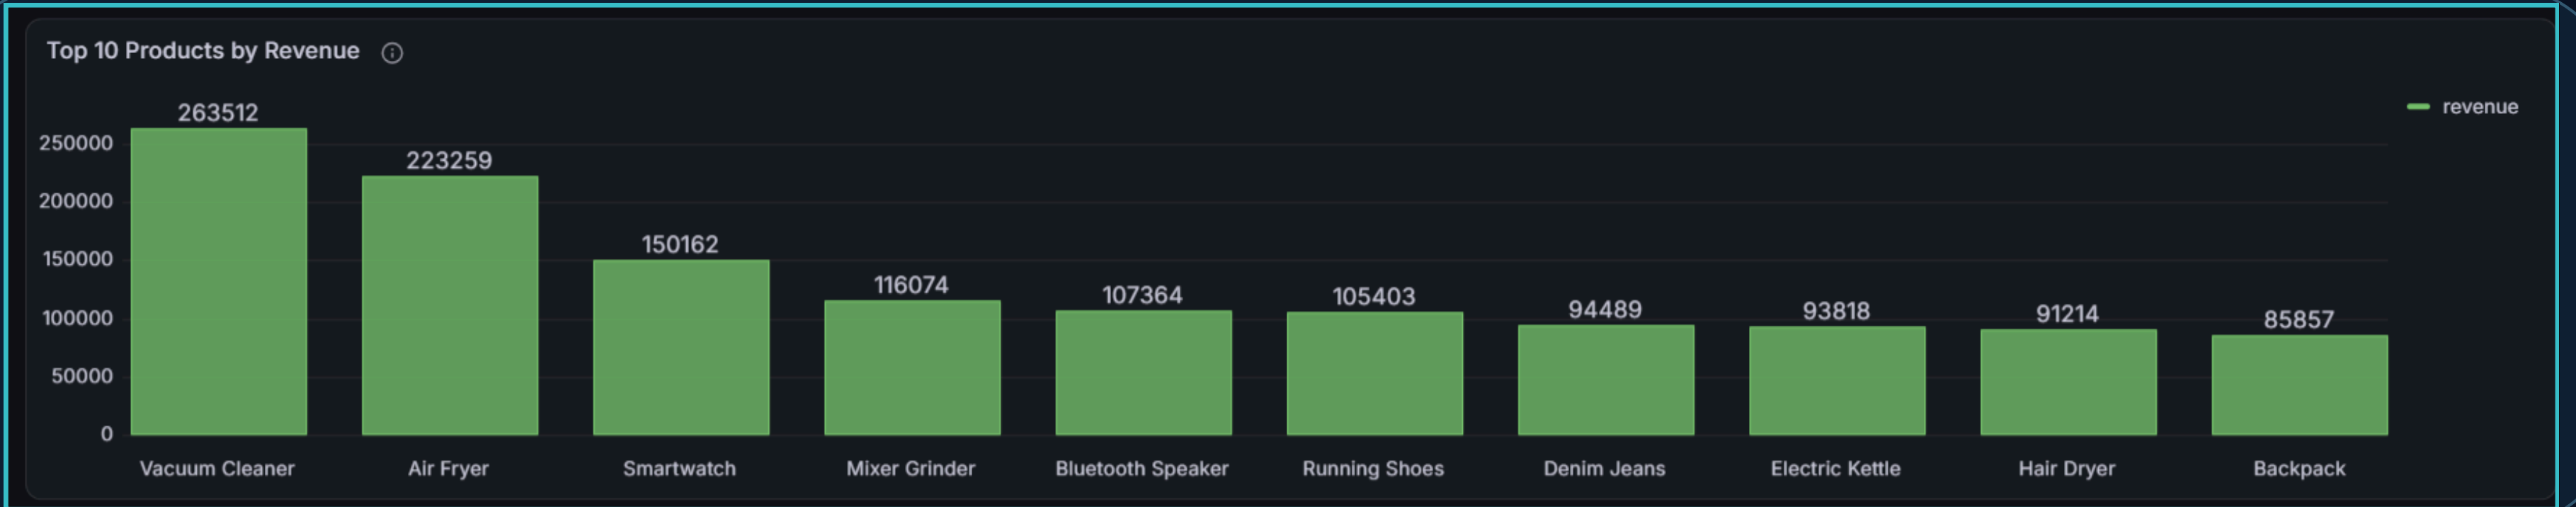

INSIGHT

- The average customer order value is ₹3,563.
- This indicates the typical revenue generated from a single order.
- The value changes dynamically when the Region, Category, or Channel filters are applied.

BUSINESS VALUE

Helps monitor customer spending levels and transaction value.

Top 10 Products by Revenue

INSIGHT

- Identifies the 10 products generating the highest revenue.
- Shows which products make the largest contribution to overall sales.
- Helps identify high-performing products that have strong customer demand.

BUSINESS VALUE

Helps with product prioritisation and inventory planning.

Customer Segment Average Order Value

Customer Segment AOV

INSIGHT

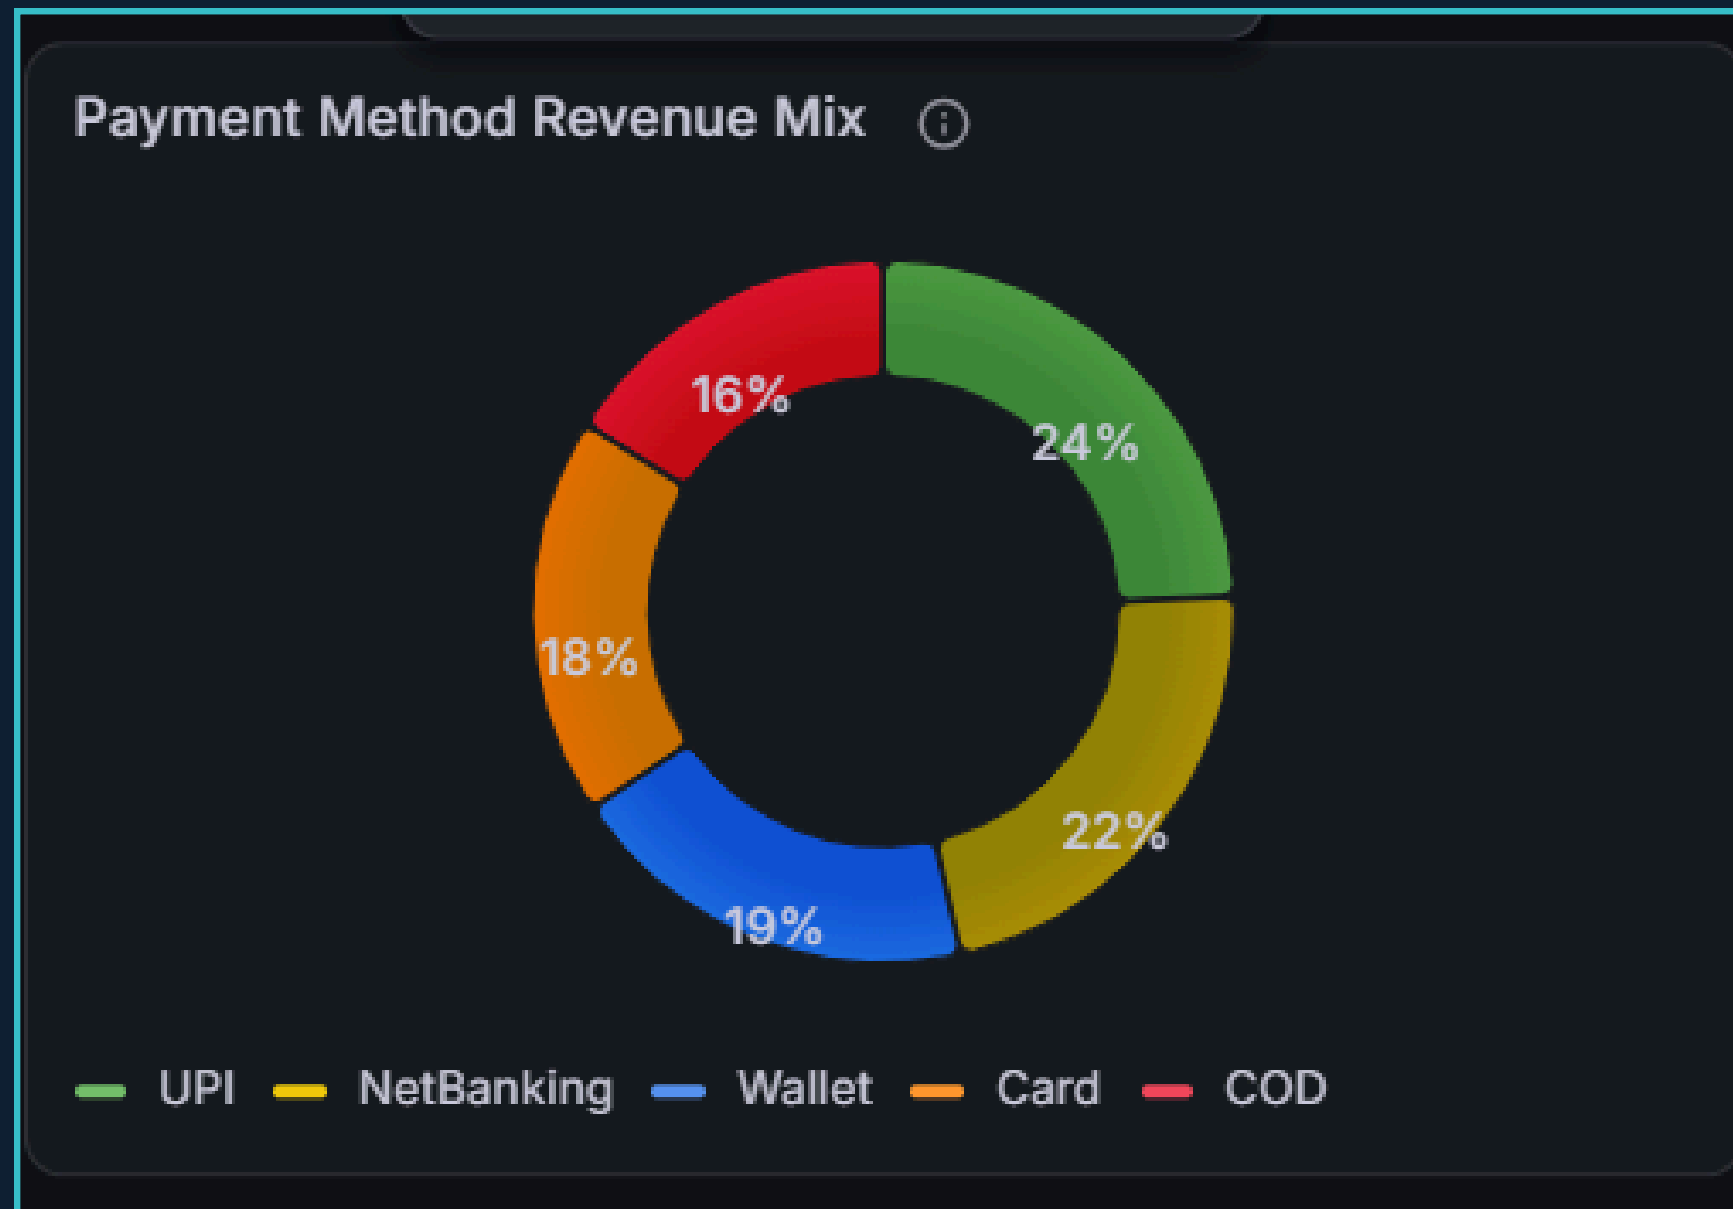

- Compares the average order value of New, Premium, and Regular customers.
- The chart shows differences in spending levels across customer segments.
- New customers have the highest average order value, while Regular customers have the lowest among the three segments shown.

BUSINESS VALUE

Helps understand spending behaviour across customer segments

Payment Method Revenue Mix

Payment Method Revenue Mix

INSIGHT

- Shows how revenue is distributed across different payment methods.
- Highlights the contribution of each payment method to total revenue.

BUSINESS VALUE

Helps monitor payment preferences.

Discount Strategy by Category

Discount Strategy by Category

Discount Strategy by Category ⓘ				
category	avg_discount_pct	avg_order_value	total_revenue	units_sold
Home	8.68	6623	728578	210
Electronics	7.73	4201	407512	176
Fashion	7.40	3666	381274	207
Beauty	7.07	1916	180107	188
Grocery	7	882	83835	172

INSIGHT

- Compares discount levels with order value, revenue, and units sold across categories.
- Shows how discounting differs between product categories.

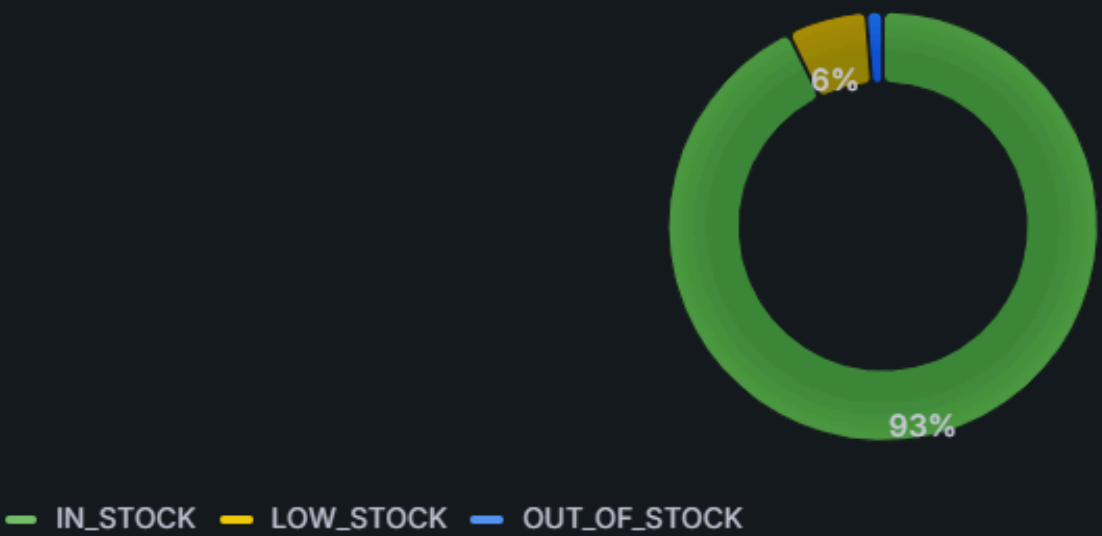

BUSINESS VALUE

Helps assess discount effectiveness.

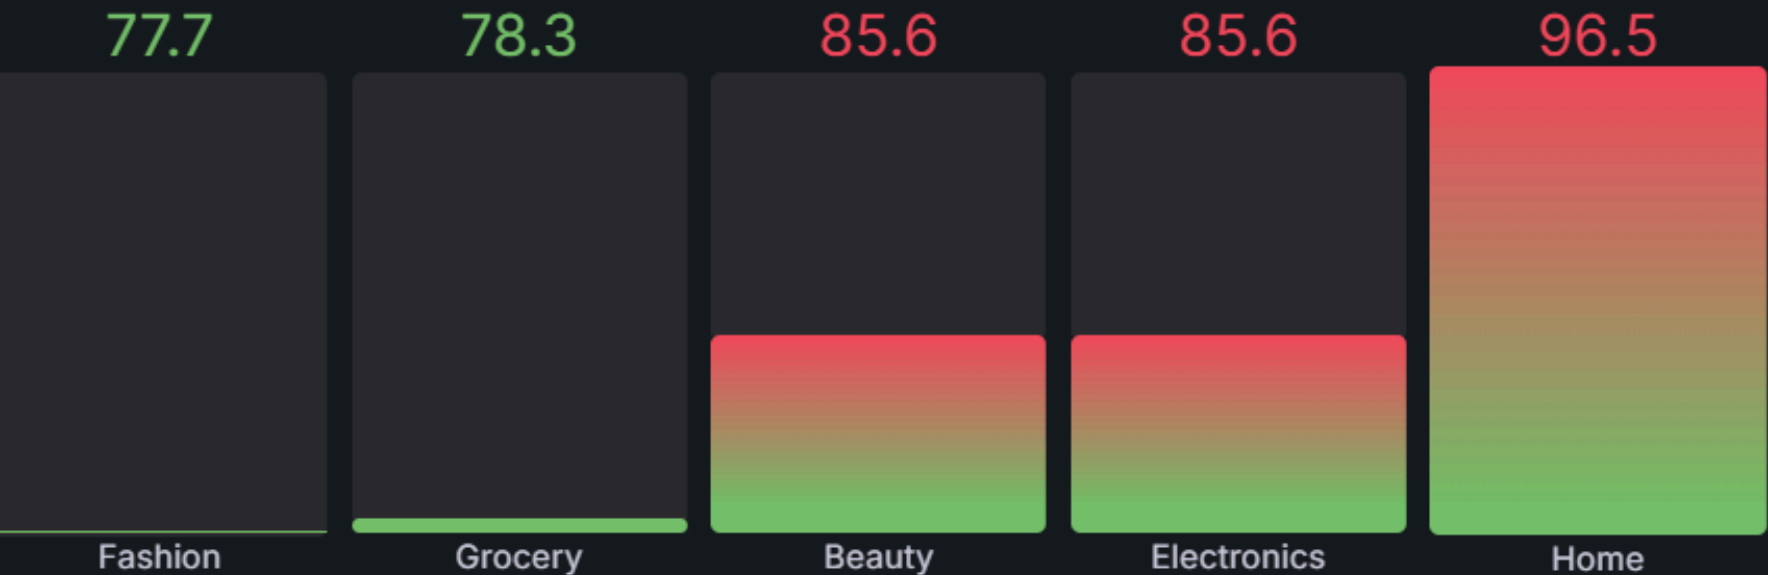

Inventory & Customer Engagement

Inventory & Customer Engagement

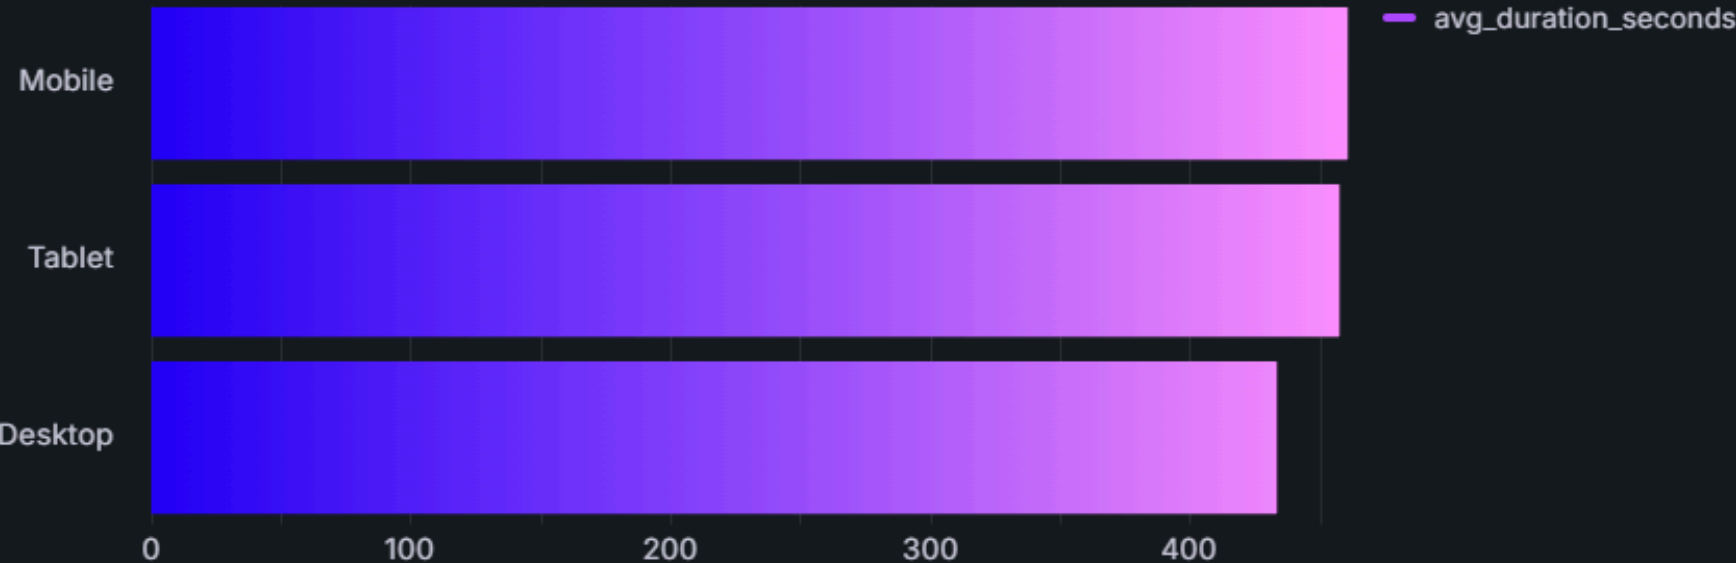

Inventory Status Distribution

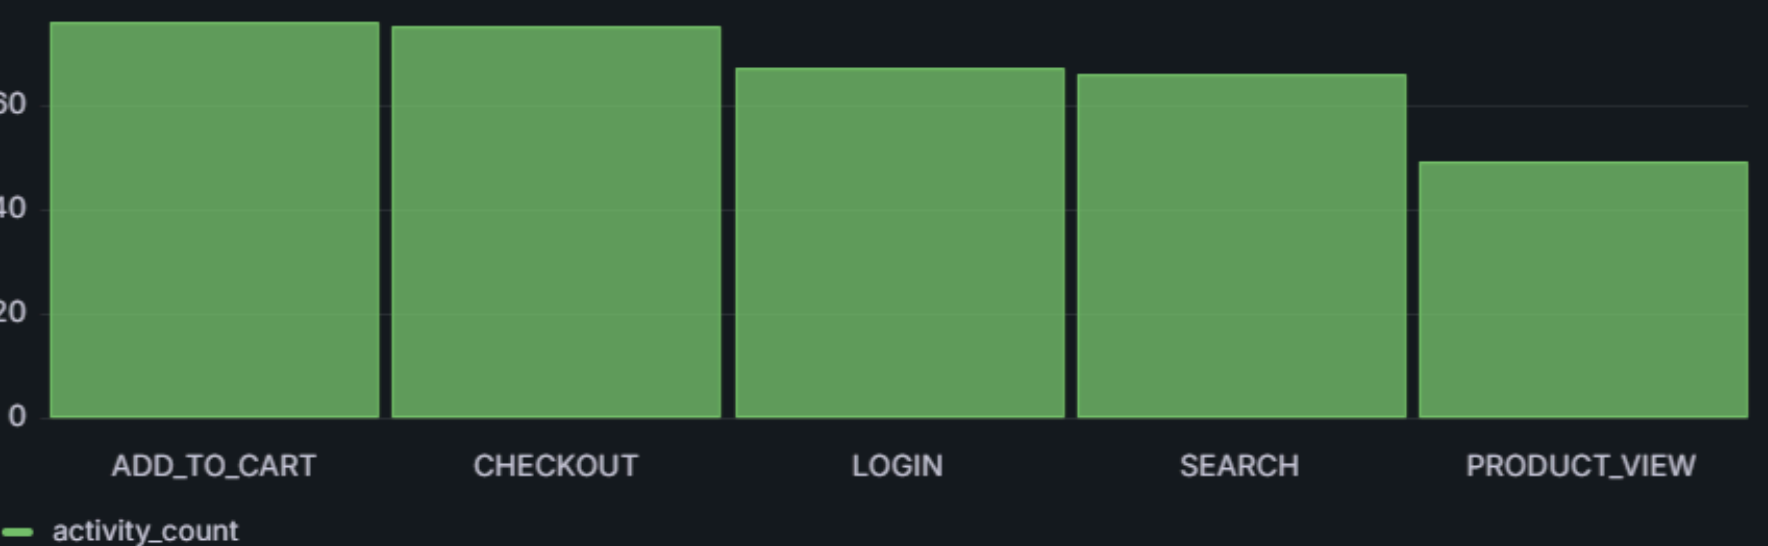

Average stock remaining above/below the reorder level

Customer Engagement Duration by Device

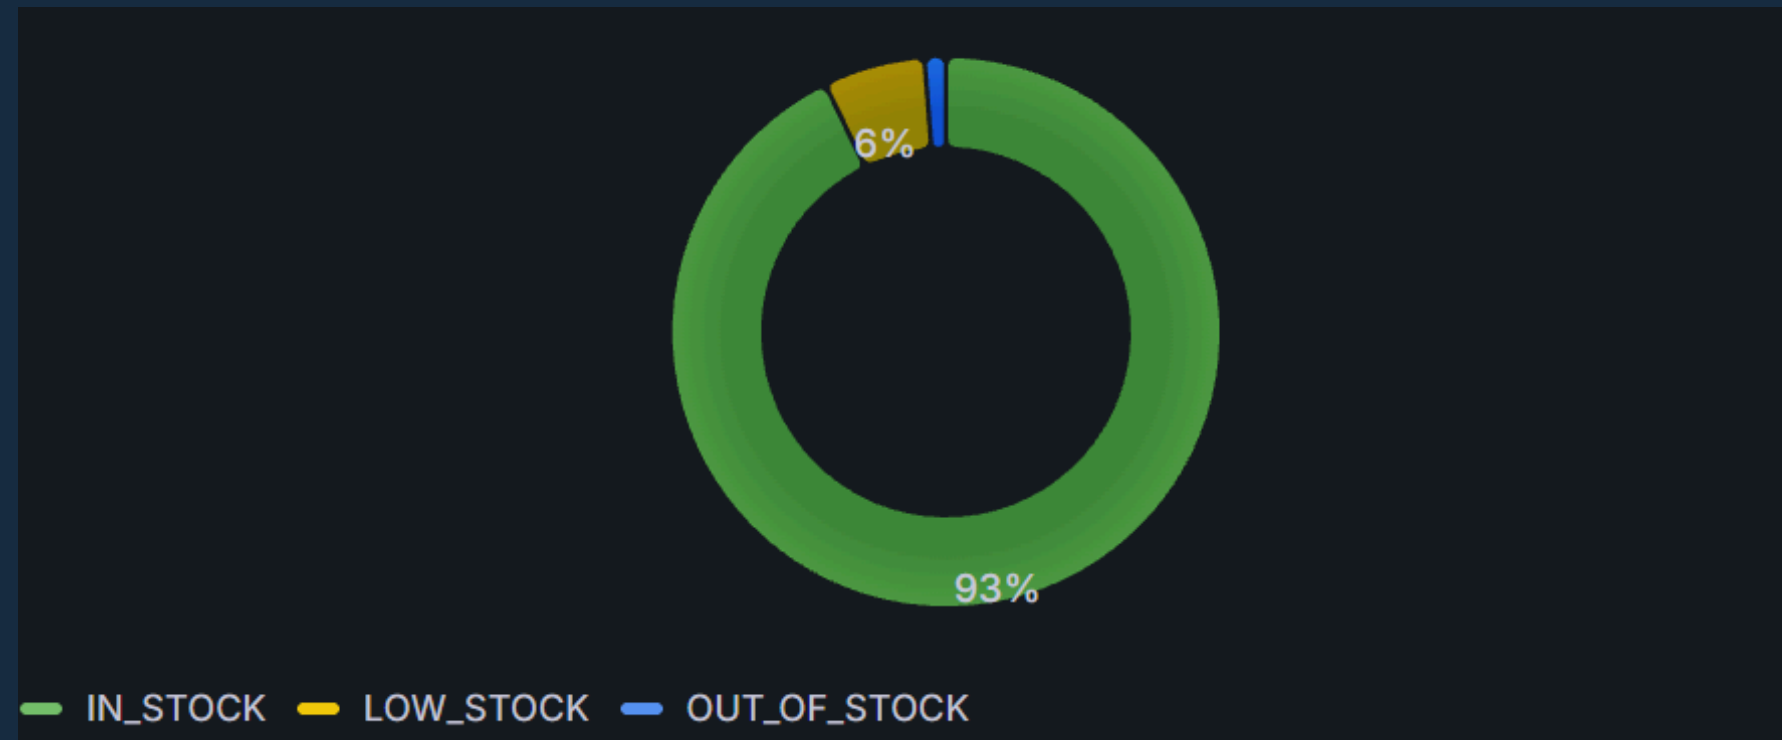

Customer Activity Volume by Type

Inventory Status Distribution

Distribution of inventory events by stock status.

Inventory Status Distribution

INSIGHT

- 93% of inventory is IN_STOCK, indicating strong overall product availability.
- 6% is LOW_STOCK, highlighting products that may require replenishment soon.
- OUT_OF_STOCK is very low (around 1%), but these items can still create potential lost-sales risk.

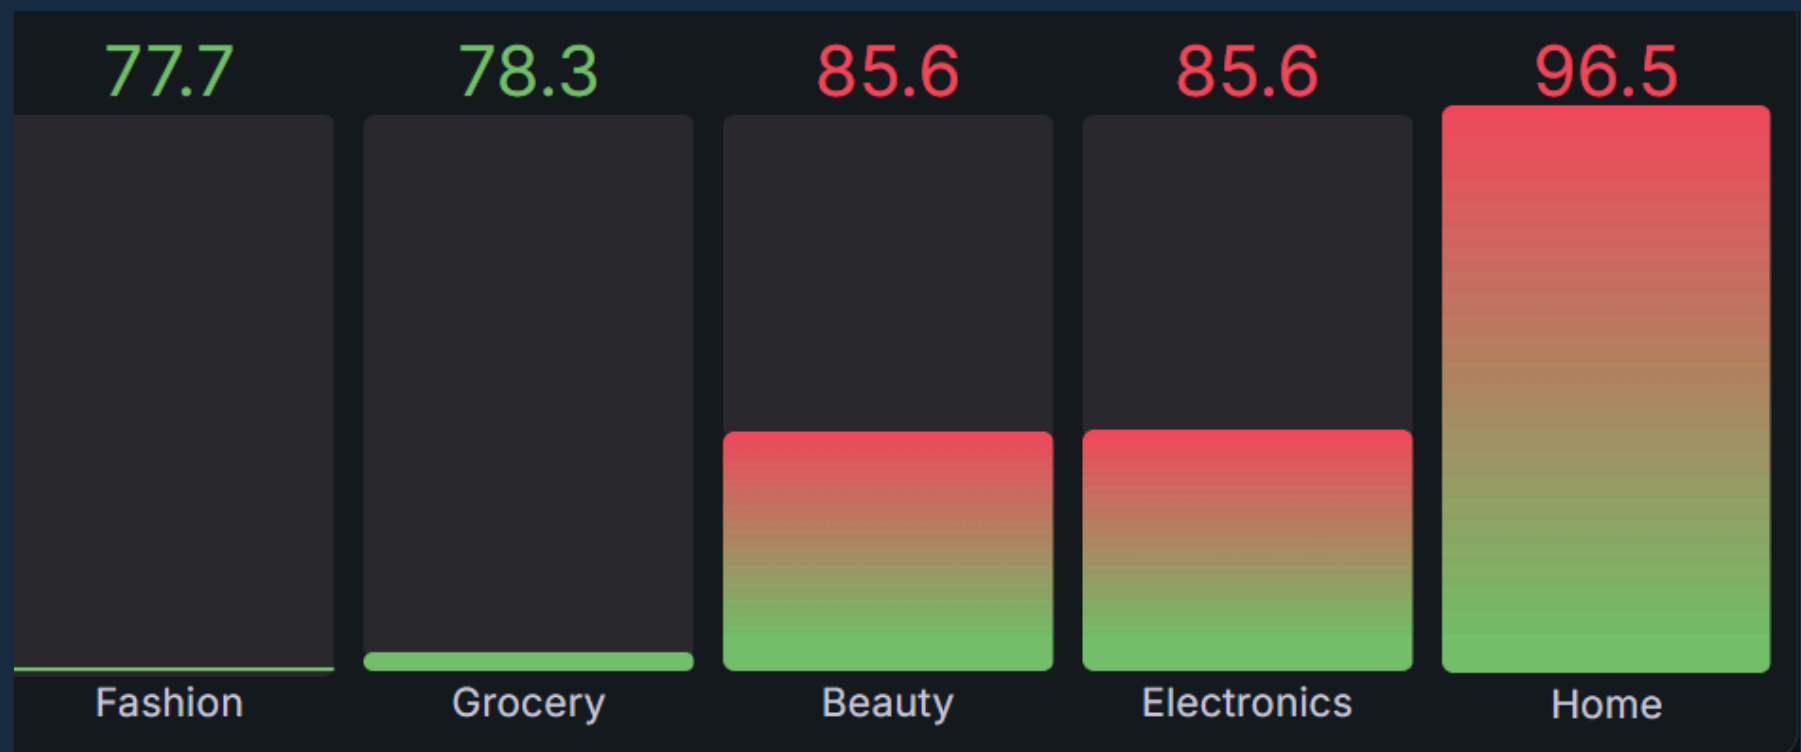

BUSINESS VALUE

Helps identify inventory availability pressure.

Stock Cushion by Category

Average stock above or below reorder level by category.

Stock Cushion by Category

INSIGHT

- Home has the highest stock cushion at 96.5, indicating relatively strong inventory availability.
- Electronics and Beauty are at 85.6, showing a moderate stock cushion but lower than Home.
- Fashion has the lowest cushion at 77.7, followed by Grocery at 78.3, making these categories more important to monitor for replenishment.

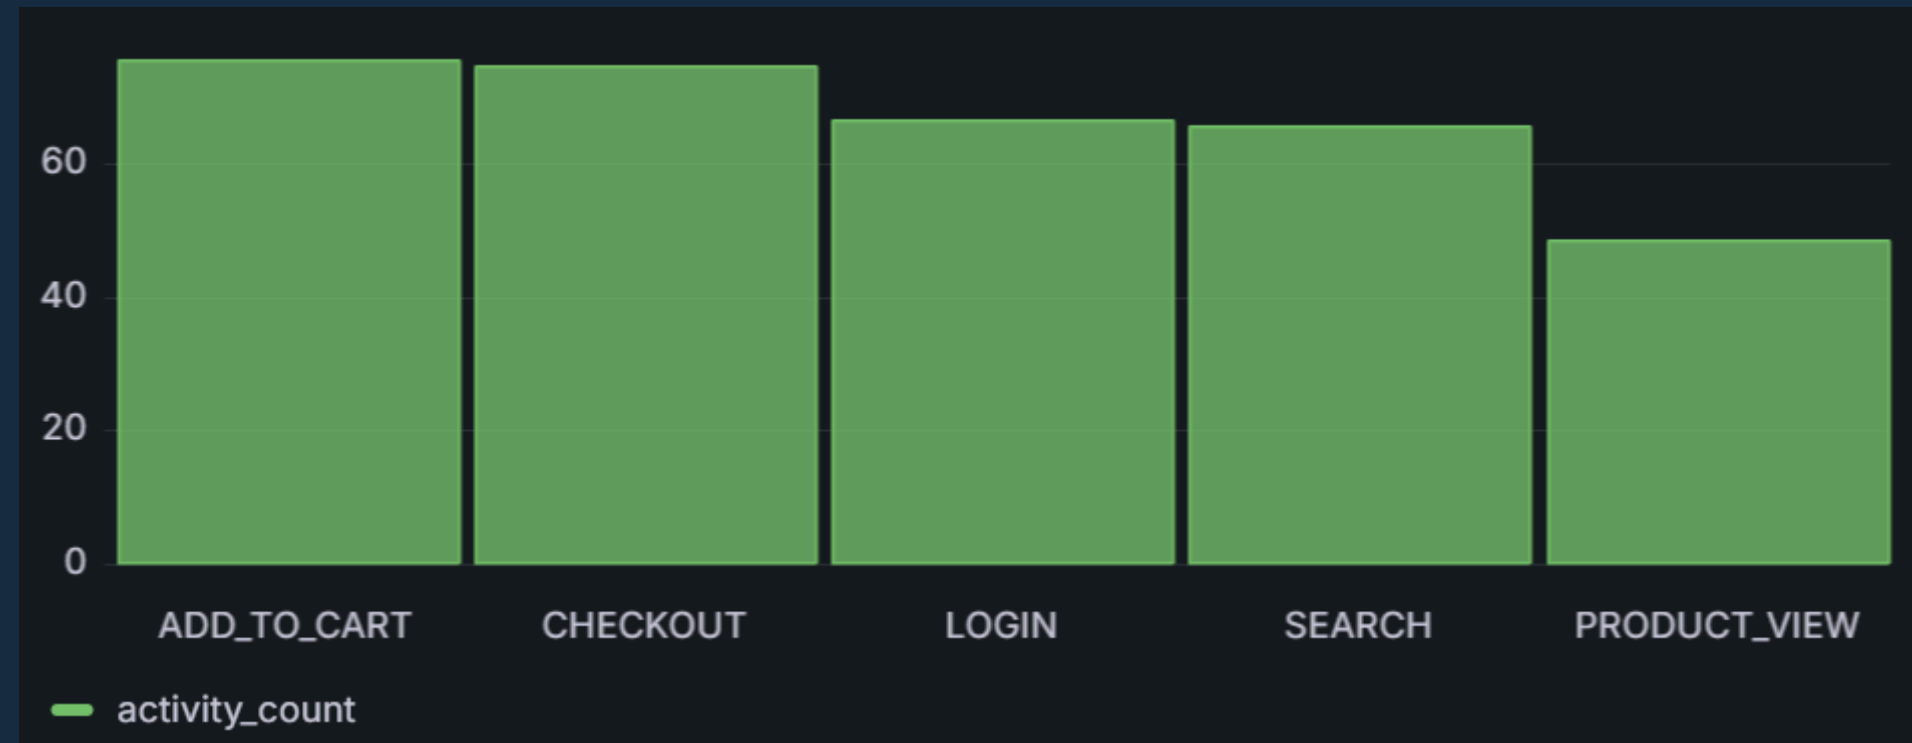

BUSINESS VALUE

Supports replenishment prioritisation before stock levels become critical.

Customer Activity Volume by Type

Count of customer activities such as search, product view, add-to-cart and checkout.

Customer Activity Volume by Type

INSIGHT

- Strong purchase intent: High cart and checkout activity shows customers are moving toward purchase.
- Conversion opportunity: Lower product-view activity suggests a need to understand the customer journey.
- Business focus: Improve checkout conversion and reduce potential drop-offs.

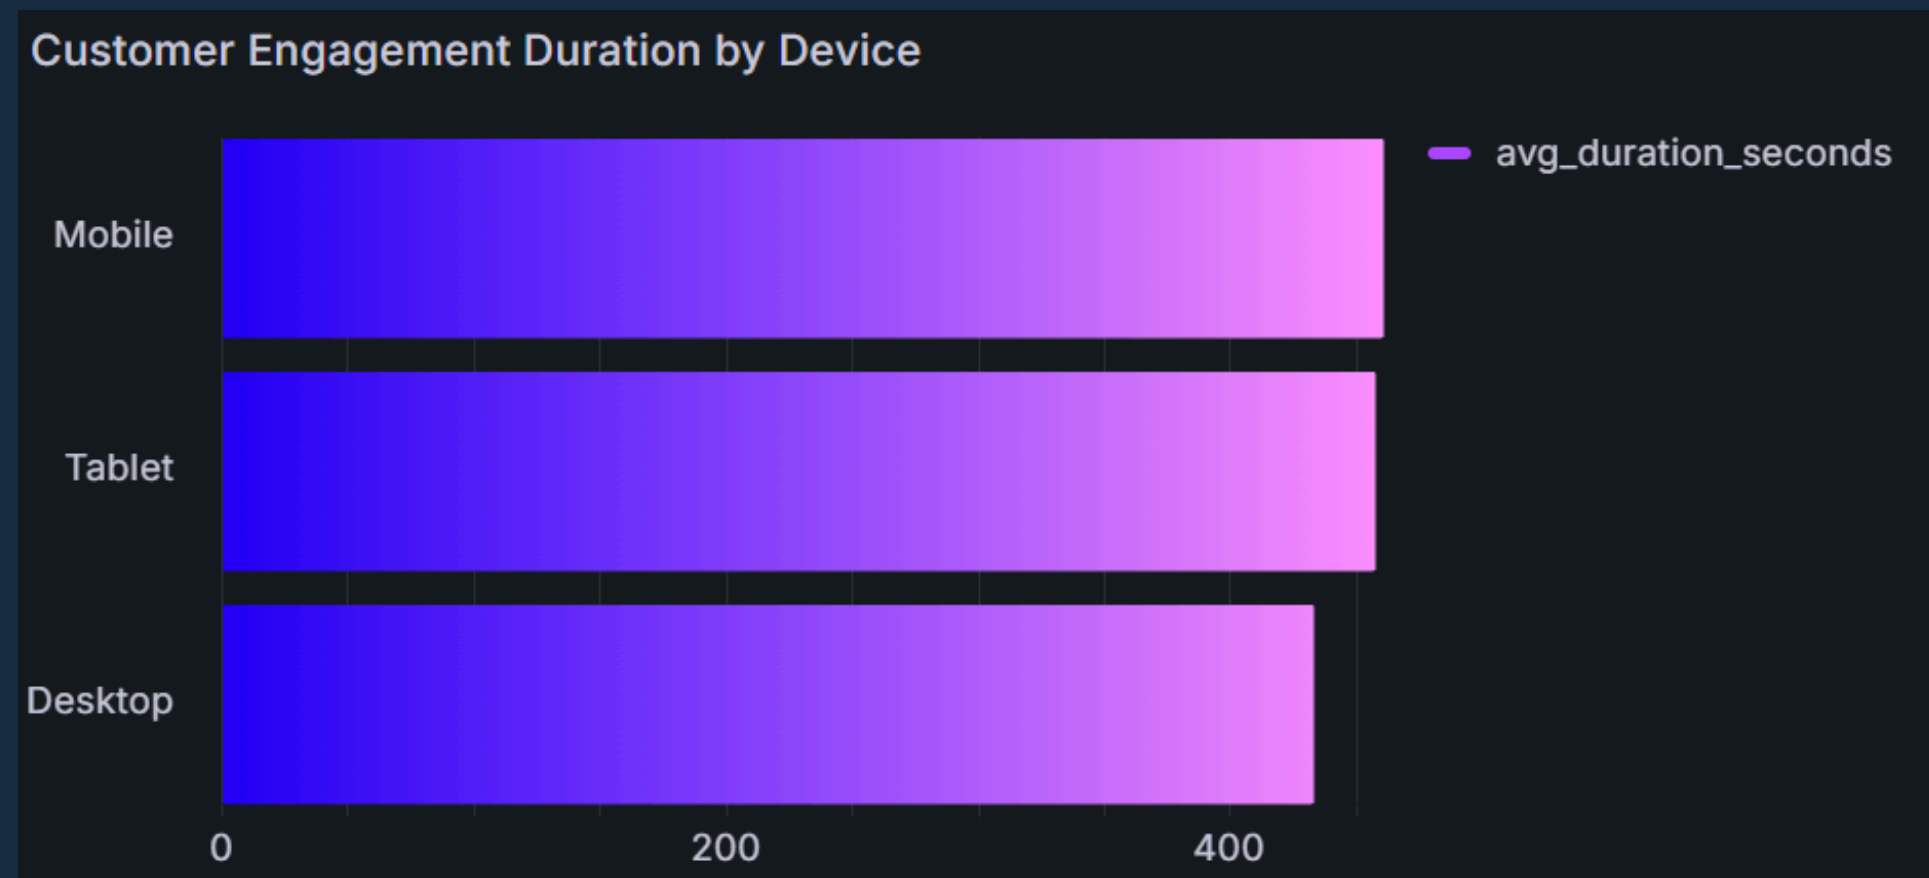

BUSINESS VALUE

Helps identify where customer engagement is concentrated in the journey.

Customer Engagement Duration by Device

Average activity duration by device type.

Customer Engagement Duration by Device

INSIGHT

- Mobile and Tablet users have the highest engagement duration, slightly above Tablet.
- Desktop has the lowest duration, suggesting mobile and tablet users spend more time engaging.
- Prioritize the mobile and tablet experience to maintain strong customer engagement.

BUSINESS VALUE

Useful for understanding device-level engagement patterns.

Returns & Financial Leakage

₹410K

Total refund value

62%

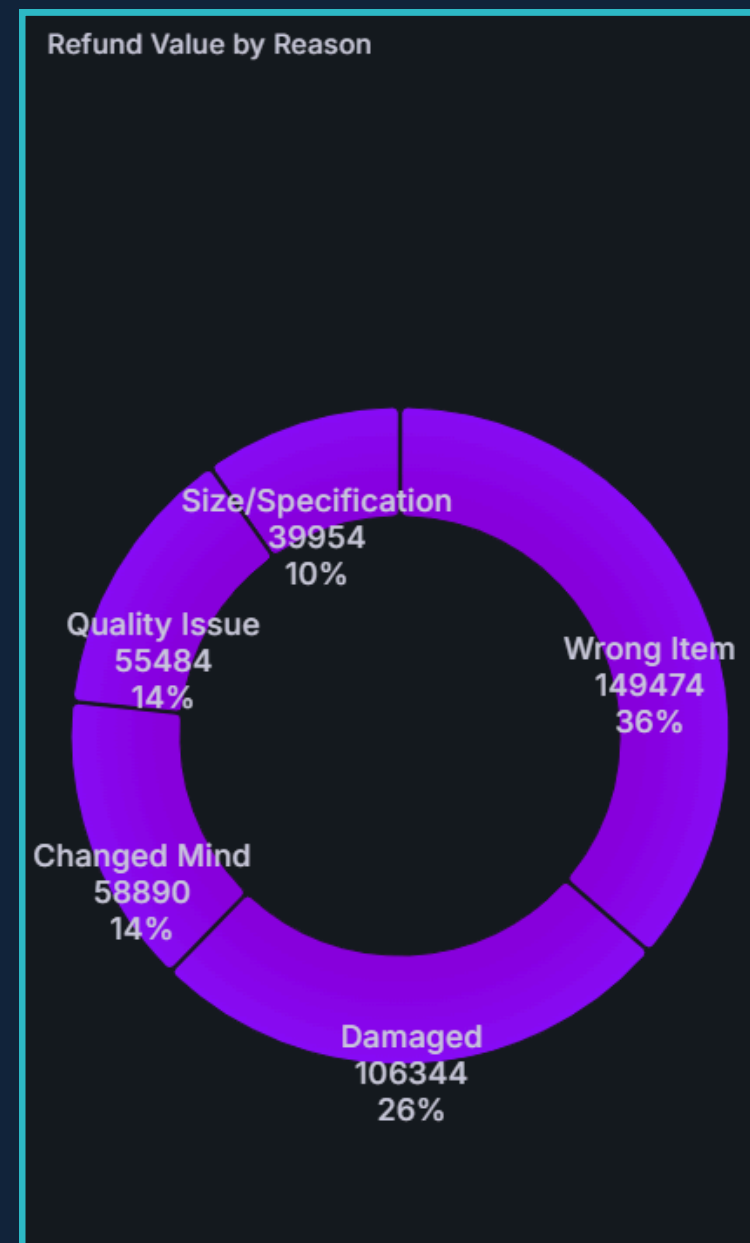

Wrong Item + Damaged

28%

Fashion return rate

Refund Value by Return Reason

Total refund value grouped by return reason.

INSIGHT

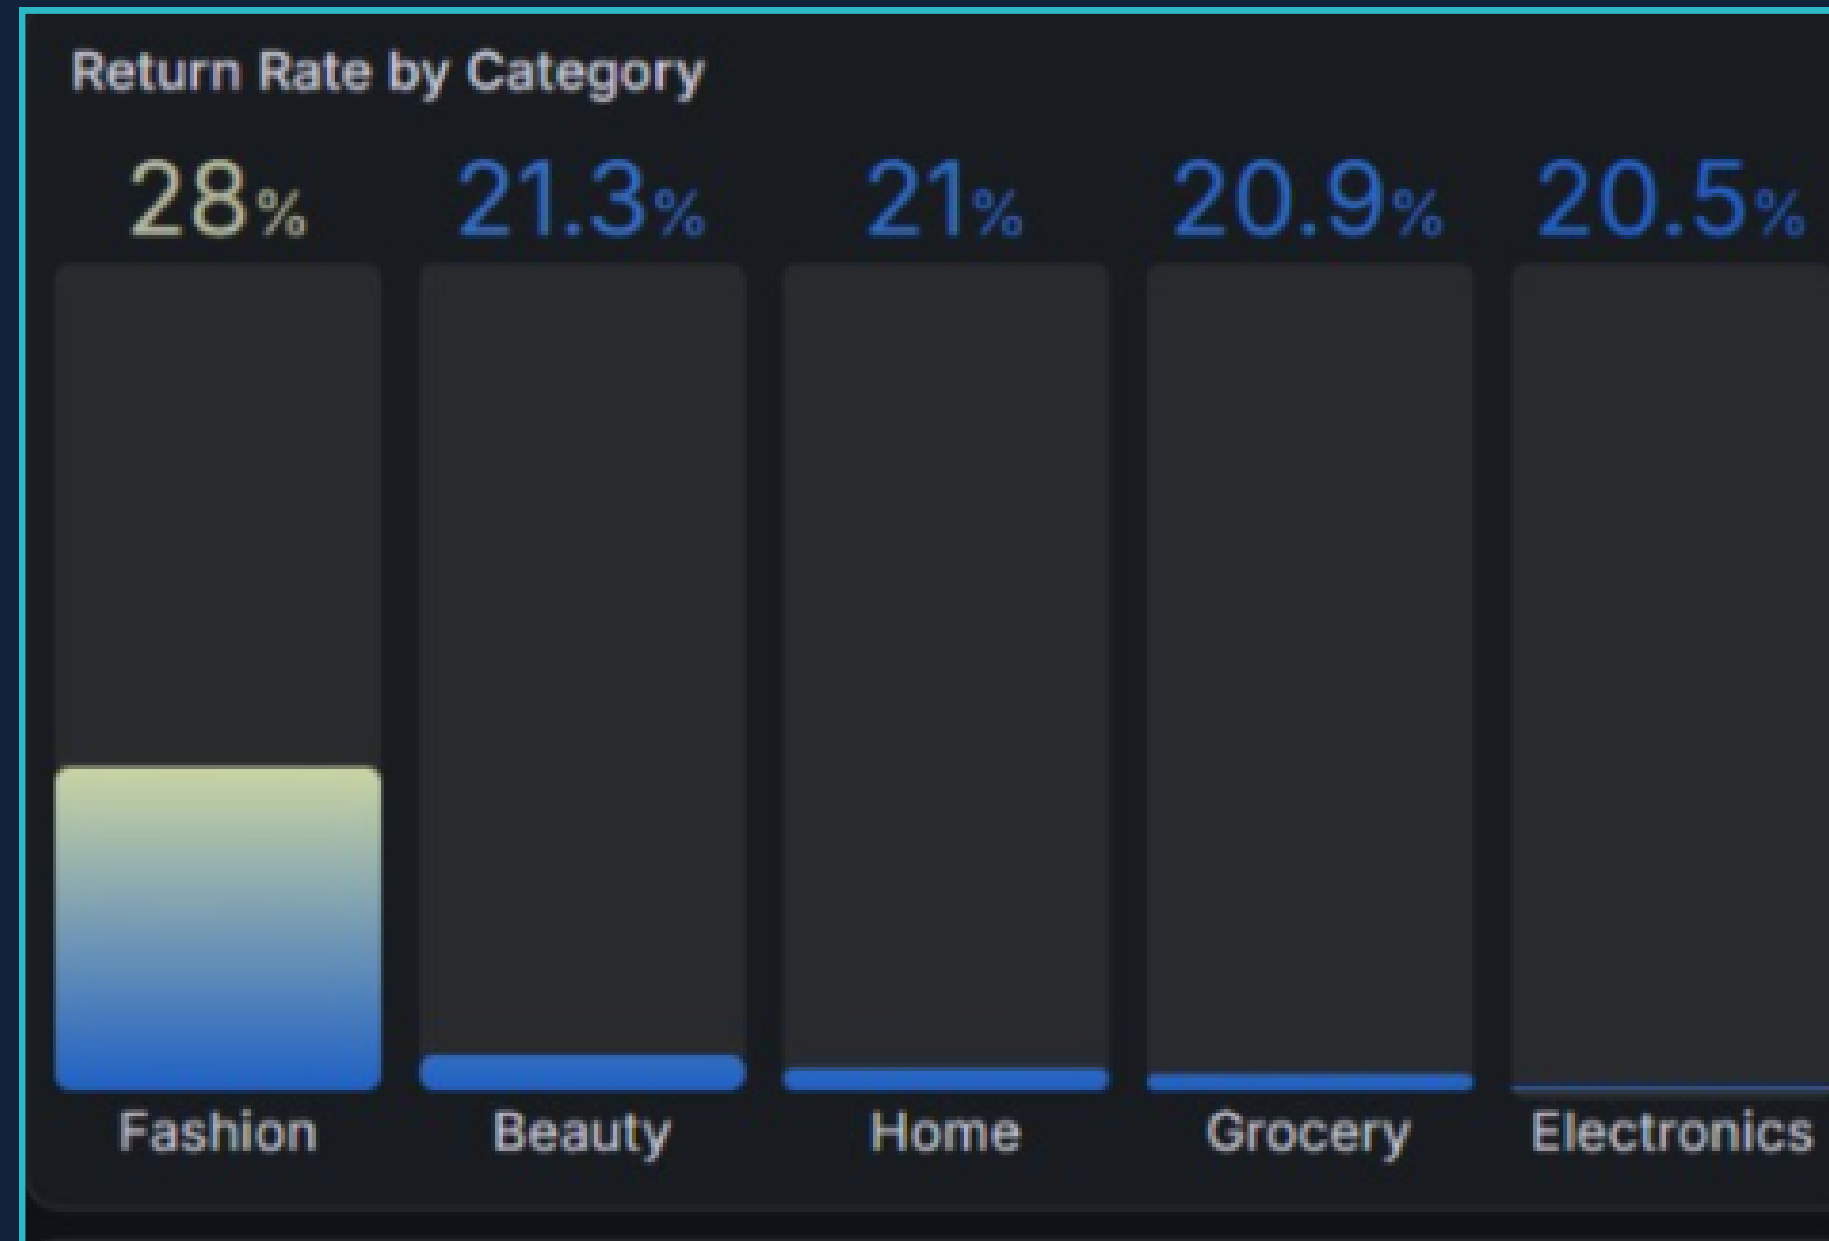

- Wrong Item is the largest driver at ₹149K (36%), followed by Damaged at ₹106K (26%).
- Together these two fulfilment-related reasons account for 62% of the ₹410K refunded.
- Changed Mind (14%), Quality Issue (14%) and Size/Specification (10%) make up the rest.

BUSINESS VALUE

The main business value is reducing refund losses. Since Wrong Item and Damaged are the biggest return reasons, we recommend better order checking and packing before dispatch.

Return Rate by Category

Returned units as a percentage of sold units by category.

INSIGHT

- Fashion has the highest return rate at 28%, about 7 points above Beauty (21.3%).
- Beauty, Home, Grocery and Electronics are tightly clustered between 20.5% and 21.3%.
- Fashion also contributes 21% of revenue, so its returns affect a meaningful share of sales.

BUSINESS VALUE

Review Fashion products and fulfilment processes to identify and reduce the main causes of returns.

Top 10 Returned Products

Products with the highest returned-unit volume.

Top 10 Returned Products	
product_name	returned_units
Backpack	15
Denim Jeans	14
Running Shoes	12
Body Lotion	12
Bluetooth Speaker	12
Hair Dryer	11
Air Fryer	11
Vacuum Cleaner	11
Storage Organizer	11
Casual Shirt	11

INSIGHT

- Backpack leads with 15 returned units, followed by Denim Jeans (14).
- Running Shoes, Body Lotion and Bluetooth Speaker follow at 12 units each; the other five products are at 11.
- The narrow 11–15 range suggests returns are spread across products, with four of the ten being fashion-type items.

BUSINESS VALUE

- Supports investigation of product quality, sizing, specification or fulfilment issues for the most returned items.
- Tells us which products to check first for quality, size or description problems.

Refund Value by Sales Channel

Refund value grouped by sales channel.

Refund Value by Sales Channels

Store	Mobile App	Online
150474	142789	116883

INSIGHT

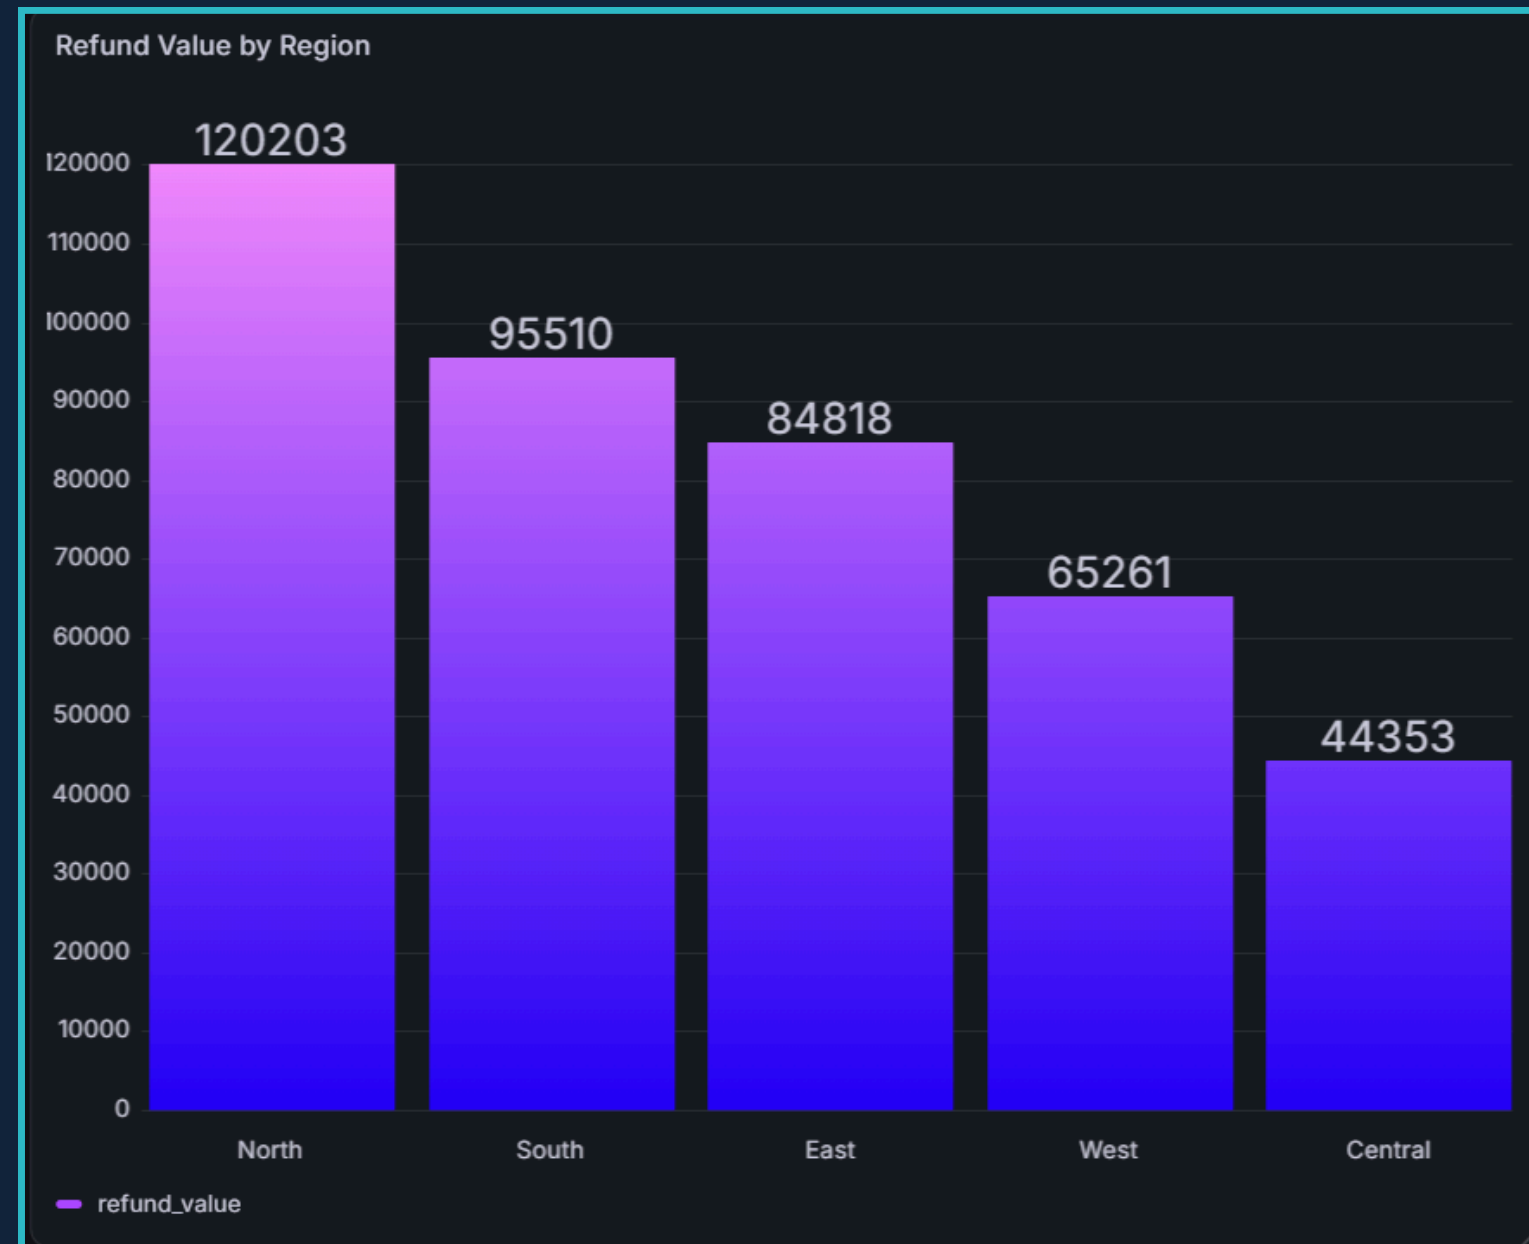

- Store carries the highest refund value at ₹150K (36.7%), closely followed by Mobile App at ₹143K (34.8%).
- Online is lowest at ₹117K (28.5%); the Store–Mobile App gap is only about ₹7.7K.
- Refund value should be read alongside each channel's sales volume to judge true return intensity.

BUSINESS VALUE

Investigate return causes in Store and Mobile App transactions to reduce refund leakage.

Refund Value by Region

Total refund value grouped by store region.

INSIGHT

- North has the highest refund value at ₹120K (29%), about 2.7× Central, the lowest at ₹44K (11%).
- North and South together account for 52% of all refunds.
- East (₹85K) and West (₹65K) sit in between.

BUSINESS VALUE

Helps target return-handling and quality checks at the regions contributing most to refund value.

Alerting

Alerting

Live Maximum Order Value

INSIGHT

- Monitors maximum order value in real time.
- Orders above ₹10K trigger an alert.

BUSINESS VALUE

- Detects high-value orders instantly.
- Enables immediate webhook notifications.
